7. Proposals Evaluation			
7.1	General	7.1.1	<p>From the time the Proposals are opened to the time the Contract is awarded, the Consultants should not contact the Client on any matter related to its Technical and/or Financial Proposal. Any effort by Consultants to influence the Client in the examination, evaluation, ranking of Proposals, and recommendation for award of Contract may result in the rejection of the Consultants' Proposal.</p> <p>Notwithstanding the above provisions, from the time of the Proposals' opening to the time of Contract award publication, if a Consultant wishes to contact the Client on any matter related to the selection process, it should do so only in writing.</p> <p>While evaluating the Proposals, the Client will conduct the evaluation solely on the basis of the submitted Technical and Financial Proposals.</p>
7.2	Evaluation of Technical Proposals	7.2.1	<p>The Client's evaluation committee shall evaluate the Technical Proposals on the basis of their responsiveness to the Terms of Reference, applying the evaluation criteria, sub criteria, and point system specified in the Bid Data Sheet. Each responsive Proposal will be given a technical score (St). A Proposal shall be rejected at this stage if it does not respond to important aspects of the RFP, and particularly the Terms of Reference or if it fails to achieve the minimum technical score indicated in the Bid Data Sheet.</p> <p>Evaluators of Technical Proposals shall have no access to the Financial Proposals until the technical evaluation is concluded.</p>
7.3	Financial Proposals for Quality Based selection (QBS)	7.3.1	Following the ranking of Technical Proposals, when selection is based on quality only (QBS), the details of the top ranked Consultant will be placed on the State Public Procurement Portal and all other Consultants shall be informed about it. The top ranked Consultant shall be invited to negotiate its proposal and the Contract in accordance with the instructions given under ITC 8.2.1 (For Quality Based Selection).

			If Financial Proposals were invited together with the Technical Proposals, only the Financial Proposal of the technically top-ranked Consultant is opened by the Client's evaluation committee. All other Financial Proposals are returned unopened after the Contract negotiations are successfully concluded and the Contract is signed.
7.4	Public Opening and Evaluation of Financial Proposals (for QCBS, FBS, and LCS methods)	7.4.1	After the technical evaluation is completed, the Client shall inform those Consultants whose Technical Proposals did not meet the minimum qualifying technical score (and shall provide information relating to the Consultant's overall technical score, as well as scores obtained for each criterion and sub-criterion) or were considered non responsive to the RFP and TOR, that their Financial Proposals will be returned unopened after completing the selection process. The Client shall simultaneously notify in writing those Consultants that have secured the minimum overall technical score and inform them the date, time and location for opening the Financial Proposals. The result of the technical evaluation shall also be placed on the State Public Procurement Portal. The opening date should allow Consultants sufficient time to make arrangements for attending the opening. The Consultant's attendance at the opening of the Financial Proposals (in person, or online, if such option is indicated in the Bid Data Sheet) is optional and is at the Consultant's choice.
		7.4.2	The Financial Proposals shall be opened publicly by a committee constituted by the Client for this purpose in presence of those Consultants or their representatives whose proposals have passed the minimum technical score. At the opening, the names of the Consultants, and the overall technical scores, including the breakdown by criterion, shall be read aloud. The Financial Proposals will then be inspected to confirm that they have remained sealed and unopened. These Financial Proposals shall be then opened, and the total prices read aloud and recorded. The Consultants or their representatives who are present at the opening of the Proposals and the members of the Proposals opening Committee shall sign the record.
	Correction of errors	7.4.3	Activities and items described in the Technical Proposal but not priced in the Financial Proposal, shall be assumed to be included in the prices of other activities or items, and no corrections are made to the Financial Proposal.
		7.4.3.1	If a Time-Based contract form is included in the RFP, the Client's evaluation committee will (a) correct any computational or arithmetical errors, and (b) adjust the prices if they fail to reflect all inputs included for the respective activities or items in the Technical Proposal. In case of discrepancy between (i) a partial amount (sub-total) and the total amount, or (ii) between the amount derived by multiplication of unit price with quantity and the total price, or (iii) between words and figures, the former will prevail. In case of discrepancy between the Technical and Financial Proposals in indicating quantities of input, the Technical Proposal prevails and the Client's evaluation committee shall correct the quantification indicated in the Financial Proposal so as to make it consistent with that indicated in the Technical Proposal, apply the relevant unit price included in the Financial Proposal to the corrected quantity, and correct the total Proposal cost.
		7.4.3.2	If a Lump-Sum contract form is included in the RFP, the Consultant is deemed to have included all prices in the Financial Proposal, so neither

			arithmetical corrections nor price adjustments shall be made. The total price, net of taxes understood as per ITC Clause 7.5 below, specified in the Financial Proposal (Appendix D of the ToR) shall be considered as the offered price.

7.6	Conversion to Single Currency	7.6.1	For the evaluation purposes, prices shall be converted to Indian Rupees using the selling rates of exchange, source and date indicated in the Bid Data Sheet.
7.7	Evaluation in case of Quality cum-Cost- Based Selection (QCBS)	7.7.1	<p>All over project award criteria have based on the score that the bidder will get after the passing out financial and technical aspects of the proposal. This score will give the clear view for awarding the project. This Methodology is based on following formula-</p> <p>Financial score of Bidder S(r) $S(r) = 100 \times F / F(m)$ Where F=Proposal to be consider F(m) = Highest price bid Final score of the Bidder = S (t) x T (t) + S(r) x F(r) Where S (t) = Technical score of bidder (Evaluation of technical proposal) T (t) = Technical multiplying factor = 0.8 S(r) = Financial score of the Bidder. F(r) = Financial multiplying factor = 0.2 F = financial bidding amount, proposal to be considered of different parties which is variable as per the amount of different bidders. F(m) = highest bid for the proposal and not variable. The technical score of bidder comes from the technical table as mention above. Based on this the final score is derived by multiplying the technical factor T(t) with the technical score and financial score with the financial multiplying F(r) Also technical and financial factor are not variable.</p> <p>The score under the Technical Proposal Submission would be the arithmetic sum of the marks assigned to the Bidders under each of the parameters listed above.</p>
7.8	Evaluation in case of Fixed-Budget Selection (FBS)	7.8.1	In the case of Fixed-Budget Selection (FBS), the Client will select the firm that submitted the highest ranked Technical Proposal that does not exceed the budget indicated in the RFP, and invite such Consultant to negotiate the Contract. Proposals that exceed the indicated budget will be rejected.
7.9	Evaluation in case of Least-Cost Selection (LCS)	7.9.1	In the case of Least-Cost Selection (LCS), the Client will select the Consultant with the lowest evaluated total price among those consultants that achieved the minimum technical score, and invite such Consultant to negotiate the Contract.
8. Negotiations and Clarifications

8.2	Availability of Key Experts	8.2.1	The invited Consultant shall confirm the availability of all Key Experts included in the Proposal as a pre-requisite to the negotiations, or, if applicable, a replacement in accordance with Clause 3.6 of the ITC. Failure to confirm the Key Experts' availability may result in the rejection of the Consultant's Proposal and the Client proceeding to negotiate the Contract with the next-ranked Consultant.
		8.2.2	Notwithstanding the above, the substitution of Key Experts at the negotiations may be considered if due solely to circumstances outside the reasonable control of and not foreseeable by the Consultant, including but not limited to death or medical incapacity. In such case, the Consultant shall offer a substitute Key Expert within the period of time specified in the letter of invitation to negotiate the Contract, who shall have equivalent or better qualifications and experience than the original candidate.
8.3	Technical negotiations or clarifications	8.3.1	The negotiations include discussions of the Terms of Reference (TORs), the proposed methodology, the Client's inputs, the special conditions of the Contract, and finalizing the "Description of Services" part of the Contract. These discussions shall not substantially alter the original scope of services under the TOR or the terms of the contract, lest the quality of the final product, its price, or the relevance of the initial evaluation be affected.
8.4	Financial negotiations or clarifications	8.4.1	The negotiations include the clarification of the Consultant's tax liability in India and how it should be reflected in the Contract.
		8.4.2	If the selection method included cost as a factor in the evaluation, the total price stated in the Financial Proposal for a Lump-Sum contract shall not be negotiated.
		8.4.3	In the case of a Time-Based contract, unit rates negotiations shall not take place, except when the offered Key Experts and Non-Key Experts' remuneration rates are much higher than the typically charged rates by consultants in similar contracts. In such case, the Client may ask for clarifications and, if the fees are very high, ask to change the rates. The format for (i) providing information on remuneration rates in the case of Quality Based Selection; and (ii) clarifying remuneration rates' structure as above, is provided in Appendix A to the Financial Form FIN-3: Financial Negotiations – Breakdown of Remuneration Rates.
8.5	Conclusion of the negotiations	8.5.1	The negotiations will conclude with a review of the finalized draft Contract. To complete negotiations the Client and the Consultant will sign the agreed Contract.
9. Award of Contract			
9.1	Award of Contract	9.1.1	After completing negotiations and clarifications and prior to the expiration of the period of validity of the Proposal, the Procuring Entity shall inform the Successful Consultant in writing, by registered post or email, that its Proposal has been accepted. Back Ground:

Ministry of Housing & Urban Poverty Alleviation has issued guidelines Support to Urban Street Vendors (SUSV) under National Urban Livelihoods Mission (NULM) National Urban Livelihoods Mission (NULM) seeks to address the concerns of urban street vendors by facilitating access to suitable spaces for vending, institutional credit, improved skills and social security linkages.

Street Vendors form a very important segment of the unorganized sector in the country. Low levels of education and skills, limited access to formal credit and micro enterprise support constrain street vendors' ability to access emerging market opportunities. On account of being un-organized and self-employed, street vendors and their families often lack in any linkage to social security, welfare and assistance schemes and initiatives of the Government. National Urban Livelihoods Mission (NULM) seeks to address the concerns of urban street vendors by facilitating access to suitable spaces for vending, institutional credit, improved skills and social security linkages.

Street vending is not only a source of self-employment to the poor in cities and towns but also a means to provide “affordable” as well as “convenient” services to a majority of the urban population. With this background, the aim of this exercise is to support ULBs in preparing the Street Vending Plan (SVP) for concerned City.

Objectives

The objective of the component is to address the vulnerabilities of the urban street vendors, this includes:

- i. Survey of street vendors and issue of Identity Cards
- ii. Development of city street vending plans
- iii. Infrastructure development of vending zones in the city
- iv. Training and Skill Development
- v. Financial Inclusion
- vi. Access to credit
- vii. Linkages to social security schemes

Identifying the street vendors

The first and foremost task is to identify the street vendors. Street vendors in ULBs area has to be identified and estimated and numbered at ground level for Biometric process. The vendor has to be divided into three categories:

1. Stationary
2. Peripatetic
3. Mobile.

Once the vendor list is finalized, the following tasks have to be undertaken:

1. Identifying the places for time sharing basis vending zones at a place after closing of market for main trade (Night –Bazaars).
2. Identification of weekend markets zones.
3. Identifying the street vending markets/outlets along-with the capacity of street vendors. Identification and describe the procedure of allotment of sufficient space for temporary ‘Vendors’ Markets’(e.g. Weekly Haats, Rehri Markets , Night Bazaars, Festival Bazaars, Food Street Marts etc.)

Components

1. Survey and Issue of Identity Cards

Under this sub-component, for conduct of survey for identification and enlisting of street vendors. The survey should preferably be conducted on a whole city basis covering one area (ward/ zone/ specified part of city) at a time, the survey must include:

- Name
- Name of parents
- Permanent Address
- Present Address
- Identity proof (if any)
- Telephone number (if any)
- Place of vending
- Type of vending activity
- Time/Duration of engagement as a vendor
- Details of family members
- If identified as beneficiary/poor for any of the government schemes

During the survey, the original documents pertaining to present/permanent address proof, especially in the case of migratory population may also be verified so that the Identity Cards issued to the surveyed street vendors can act as sufficient documentation for opening of their bank accounts, getting loans from banks, accessing social security benefits, etc.

GIS Base mapping and Surveys

GIS mapping has to be undertaken at two levels namely:

- 1. City level mapping,**
- 2. and vendor level mapping.**

City level mapping: The geo-referenced base map of the city shall serve as a foundation for preparing Street Vending Plan where all other thematic maps may be overlaid for spatial analysis. Thus, it shall aid Planners in preparing Vendor Plan. City level GIS mapping has to be done with the help of latest satellite imagery. For that purpose, Procurement of **Cartosat II** / Quick Bird / World View satellite image from the National Remote Sensing Agency (NRSC) or any other authorized Agency for the project area has to be purchased by the Consultant and it shall be reimbursed by the client.

The following layers have to be created in city level mapping:

1. City/Municipal and ward boundaries
2. Vendors/vendor zones will be captured using GPS equipment
3. All water bodies, viz., Stream, creeks, tanks, etc
4. Roads with classification as Arterial /Sub arterial /Slum roads etc
5. Railroads, Other landmarks such as temples, mosques, church etc.

Vendor location level mapping: The delineation of vendor zonal boundaries has to be done with the full involvement of the vendors and its association, if any. The delineation of boundary will be done in ARC-GIS with the help of GPS co-ordinates captured for all the vendors.

Capturing biometric identity of Street vendors: The following steps have to be followed for capturing bio-metric identity of the vendors:

1. Developing and implementation of user interface to capture biometric identity data
2. Installation or deployment of user interface software in laptops to capture biometric identity data
3. Store biometric data into database in appropriate format
4. Check and validate stored biometric data.

Vendor census survey: Vendor census survey has to be carried out with a survey format finalised in consultation with Municipal Corporation and it has to be carried out with a trained enumerators in a digital format i.e. survey data directly captured in the MIS Software which has to be developed by the consultant for this purpose.

Preparing de-duplication software: In order to avoid duplication, consultants have to develop de-duplication software and the steps have to be followed are as listed below:

1. Developing and Implementation of de-duplication software to verify captured biometric data using **Neuro** technology or ISO formats.
2. Generate a report for duplicated (bulk) biometric data
3. Allow duplication verification process while capturing biometric data at the later stage.

Identity Cards to be issued to all the surveyed/identified street vendors. A data base of all street vendors will be maintained by the ULB. Since the vendors are mobile, the software should be able to track (based on either present/permanent address or any other criteria) whether the vendor has already been covered and issued an Identity Card.

Preparing biometric ID cards for Street vendors: Each vendor surveyed has to be given Bio-metric cards and the steps followed are listed as below:

1. Format collective biometric data (with finger prints, family photo) for ID cards to print (current & future prints)
2. Verify the correctness of formatted biometric data
3. Print Street Vendor ID biometric cards

Such identity cards & license has to be given to the street vendors after approval & in the manner prescribed by the Competent Authority (Street vending Committee/organisation).

2. Preparation of City Street Vending Plan

Under this sub-component, for preparation of City Street Vending Plan contain the following:

- i. profile of street vending trades and activities;
- ii. spatial distribution of street vending activities;
- iii. earmarking of space or area for vending zones;
- iv. determination of vending zones as restriction- free vending zones, restricted vending zones and no-vending zones;
- v. estimates of holding capacity of vending zones, which is the maximum number of street vendors who can be accommodated in any vending zone;
- vi. understanding of key challenges, constraints and issues relating to street vending; and
- vii. Possible solutions and potential street vending areas.

The Street Vending Plan will also take into account the natural markets where sellers and buyers naturally congregate for the sale and purchase of products and services. The Plan will be developed after consultations with Street Vendor's representatives and other relevant stakeholders.

While preparing the Street Vending Plan, in coordination with the city police, traffic police, planning authority and other local agencies should also devise and promote vendor friendly policies, solutions and strategies to accommodate and facilitate street vending in a manner that is conducive to street vendors and the public at large. This may include policies for traffic management and regulation on market days or at certain times of the day, arrangements for lighting, water, sanitation and waste disposal in street vendor market areas. The ULB may coordinate with planning authorities to develop pro-vending norms and stipulation of vending spaces in new or refurbished roads, markets, office and residential complexes and other public spaces and public infrastructure. This will ensure greater acceptability of Street Vending Plans among the stakeholders.

Management Information System: Street vending Plan has to suggest methods of Monitoring system using MIS software. For such purpose, software has to be developed for monitoring after implementation of the street vending Plan to monitor the entire allotment, registration and the whole above process. This MIS software has to be developed in consultation with the Municipal Corporation. Provision of web base survey for review and monitoring of Survey (for 1 year) should be taken.
